

# SELECTPaper/ CARDBOARD SHREDDER

### — PRODUCT INTRODUCTION

- ◆ A cardboard shredder is a way to recycle cardboard waste into free packaging material, turning it into smaller, recyclable void-filling protective materials. Our cardboard shredder Select-Paper/Hippo is small and exquisite as a whole and does not take up space. The owner needs to select the appropriate scale and turn the switch to automatically shred into smaller pieces. In this automated process, the waste material can be effectively managed by shredding the volume of the cardboard waste, making it easier to process and recycle.
- ◆ Converting waste cardboard into void-fill material can reduce recycling costs by a significant amount in a large part of Europe, for both domestic and industrial use. The longest cutting width is 320mm, which can effectively optimize storage space, promote recycling work, and reduce the use of plastic materials.

## — ADVANTAGES

- ◆ **Recyclable:** SelectPaper/Hippo converts waste cardboard into void-filling material and is 100% recyclable, taking up less space in landfills.
- ◆ **Waste reduction:** SelectPaper/Hippo efficiently reduce the volume of cardboard waste, making it easier to handle and transport. Shredded cardboard takes up less space compared to whole boxes.
- ◆ **Packaging optimization:** Shredded cardboard can be used as a cost-effective packaging material that can provide cushioning and protection for fragile items during transportation.
- ◆ **Eco-friendly:** SelectPaper/Hippo promote sustainability by facilitating the recycling process, reducing waste sent to landfills, and encouraging the use of recycled materials.
- ◆ **Beautiful packaging:** shredded cardboard can be reused and recycled corrugated cardboard boxes into flat webs, cushioning pads, and even strips or pieces.

Model	SelectPaper/Hippo	SelectPaper/Hippo Plus
Size	550x300x270mm	700x480x1000mm
Net Weight	33kg	168kg
Board Width	≤ 425mm	≤ 500mm
Board Thickness	≤ 7mm	≤ 10mm
Speed	3m/min	12m/min
Noise	60db	72db
Voltage	110V-220V	220V-380V
