

SELECTPaper/ WRAPPING PAPER

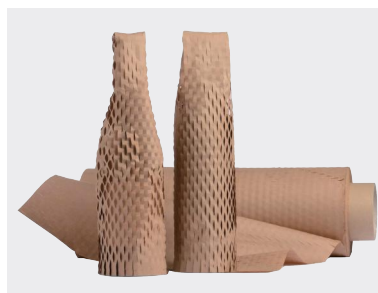

SEAGULL

STRUCTURE IS VERY SIMPLE, EASY TO OPERATE

■ PRODUCT INTRODUCTION

- ▶ Honeycomb paper roll is a sustainable way of packaging fragile items for transportation. Not only can it be completely composted, but it can also be recycled. It is the most sustainable foam packaging alternative and packaging method we have found. The honeycomb wrapping paper mainly uses 0 pollution and 0 plastic raw materials, which mainly replace the traditional plastic foam filling, and can also increase the user's unpacking experience. From a sustainability standpoint, in some cases, you've taken out 60%, 70%, and 80% of the plastic material.
- ▶ Made from recycled kraft paper, honeycomb paper helps brands across the North American market achieve their environmental goals while giving customers more options for recycling curbside recyclable packaging.

■ PRODUCT INTRODUCTION

- ▶ When the honeycomb wrapping paper machine Seagull is powered on, it can cleverly separate the honeycomb wrapping paper into a hexagonal honeycomb structure. The structure is very simple.
- ▶ It has a simple rotary button for paper feeding and a start button. It can even be equipped with a foot pedal, which is very convenient for handling and packaging.
- ▶ It is very suitable for industrial and express logistics industries.

Model	SelectPaper/Pigeon	SelectPaper/Seagull
Size	750x280x210mm	700x360x240mm
Net Weight	3.3kg	12kg
Paper Width	300-500mm	300-500mm
Speed	Manual	11m/min
Voltage	-	110V-220V
Power	-	25W

■ PRODUCT CHARACTERISTICS

- ▶ Cleverly cut and separate the kraft paper honeycomb
- ▶ Can be directly torn by hand and fold without using tape
- ▶ Green and beautiful out-of-the-box experience
- ▶ Tight honeycomb structure interlocks items in place
- ▶ Can complete a package within 20 seconds
- ▶ Automatic and without redundant maintenance
